

Reporting Language (CARLa) and can be customized for e-mail, cell phones, pagers and text messaging. The selection and layout can also be dynamically reconfigured from an ISPF application.

Tivoli zSecure Alert integrates with other tools, enabling you to send relevant alerts to your central security or network management console. For example, you can send Simple Network Management Protocol (SNMP) alerts to the IBM Tivoli Compliance Insight Manager dashboard for security policy violations, to IBM Tivoli Security Operations Manager for real-time correlation and threat monitoring, to IBM Tivoli Enterprise Console® and more.

**Take effective countermeasures**

Tivoli zSecure Alert goes beyond conventional intrusion detection solutions to help you determine what countermeasures to take when a threat is detected. For example, you can predefine and customize a measure, such as instantly revoking a user or shutting down an application if a certain security event occurs. In addition, you can send Write to Operator messages to trigger automated operations or issue RACF commands autonomously.

**For more information**

Tivoli zSecure Alert is the result of decades of experience — gained through conducting tests on main-frame systems — collected into a threat knowledge base that can quickly alert you to suspicious activities. Tivoli zSecure Alert integrates seamlessly with the complete Tivoli zSecure suite of enterprise-wide security administration and auditing solutions, providing a comprehensive, end-to-end workbench for RACF security management.

To learn more about how Tivoli zSecure Alert can help your organization detect potential violations to more effectively

meet audit and security challenges, contact your IBM representative or IBM Business Partner, or visit [ibm.com/tivoli](http://ibm.com/tivoli)
